RevereIT

IT solutions that work for your business.

We are efficient in leading a project-level coordinated effort; from outlining objectives to defining implementation strategy to training and follow-up.

VALIDATION SOLUTIONS

Partnering with many of the major Pharmaceutical, Biotech companies and Specialist consultancies to help them to exceed their regulatory obligations, RevereIT LLC is rapidly becoming the market leader in the recruitment of professionals in the Validation & Regulatory Compliance market.

Regulatory Compliance- Are you ready for the stringent standards and strict timelines? RevereIT LLC can help you meet your deadline!

The pharmaceutical industry is faced with unprecedented business challenges: rising costs, reduced government reimbursement, growing consumerism, and increased government regulation, such as 21 CFR Part 11, QA/QC, Computer System Validation, HIPPA.

We hire world Class Bio Medical, Chemical, Bio-Engineering and Bio Tech Engineers

BUSINESS ANALYSIS SOLUTIONS

Our BA group introduces the notion of process orientation, of concentrating on and rethinking end-to-end activities that create value for customers, while removing unnecessary, non-value added work.

QUALITY ASSURANCE SOLUTIONS

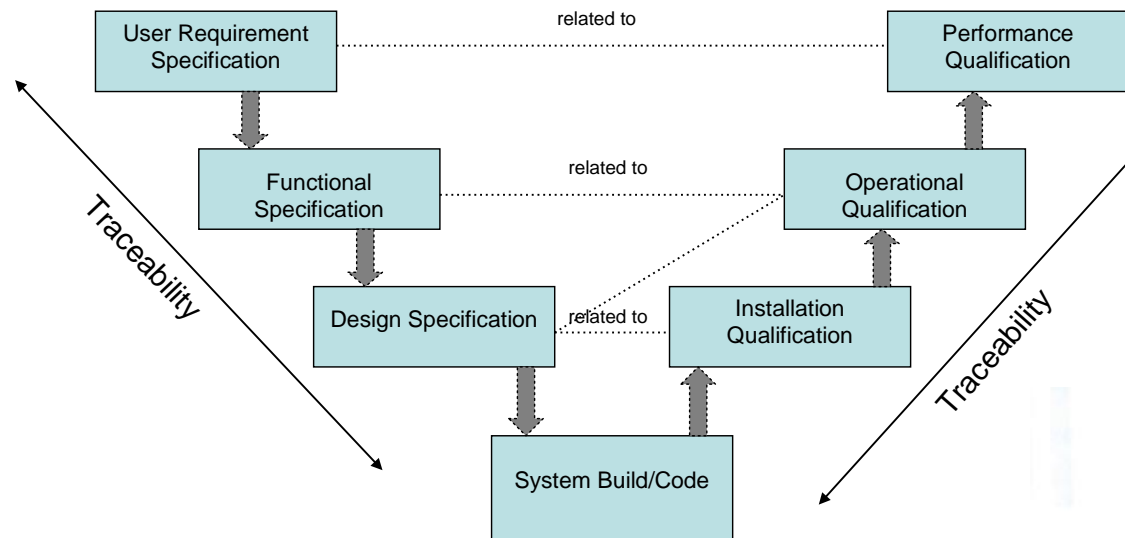

Our Quality Assurance group provides customers with unparalleled industry experience.

By making wise IT investments and fundamental changes to business models, Organizations can reduce their costs, streamline administrative processes, empower consumers, improve quality of care and increase the speed of new discoveries to market.

WE'VE WORKED WITH A DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?

Methodologies.

Tactical Services

We can also provide the right level of expertise at competitive cost with our professional compliance consultants and technical writers. Our teams are well qualified in industry best practices for validation, qualification, compliance assessments, and vendor audits that cover systems and processes in all your regulated areas.

- Validation of applications (requirements, traceability, protocols, scripts, summary reports)
- Localized regulatory compliance assessments and remediation
- Infrastructure qualification
- project management
- Training on CFR Part 11, Auditing, and Testing
- Retrospective evaluation/validation of legacy systems
- System testing
- Supplier audits
- SOP development.

CAPA Services

Whether you are planning or implementing a system to manage complaints, deviations, CAPA, or change control, already using a QMS product and planning an upgrade, deployment, or conversion, planning to integrate your QMS with ERP, MES, or document management systems, RevereIT can provide services to support your initiative.

Our CAPA capabilities cover a wide range of consulting services including process assessment and improvement, system implementation, and validation. Our CAPA teams have demonstrated experience in:

- Providing validation and testing support to CAPA system implementation projects at medical device and pharmaceutical clients
- Performing audit readiness analysis of CAPA processes
- Evaluating the effectiveness of an automated CAPA system to identify unused / under-utilized functionality that might improve the CAPA process and conformance
- Reviewing process flows and identifying areas for improvement in the overall CAPA process via benchmarking against industry best practices.
